SECTION 1

Structure Overview

The Mission Control buildout is funded via a $5M capital commitment under a restructured C-Corp entity. The Base Case + Extended BD plan is the operating engine supporting the investment thesis — $718M contracted volume, $19.4M baseline cumulative NI through FY2033, plus a ~$8.7M Mission Control uplift.

Component	Value
Pre-money valuation	$15.0M
Investment (raise or retained-earnings reinvestment)	$5.0M
Post-money valuation	$20.0M
Fully diluted share count (normalized)	10.0M shares
Price per share (post-money)	$2.00

Valuation and cap-table figures are governance inputs set by the partners; they are not derived from the construction pro forma.

SECTION 2

Post-Raise Ownership

Pre-raise ownership is distributed among the partner group; post-raise, the structure admits new investors and the employee pool, each at 25%.

Owner group — 50% post-raise

Owner	Pre-Raise	Post-Raise
Steyn Group	45.0%	22.5%
Chris Aiello	15.0%	7.5%
Bob Kennedy	15.0%	7.5%
Joe LaKamp	10.0%	5.0%
Krueger	10.0%	5.0%
Littlehale	5.0%	2.5%

Post-raise summary

Group	Ownership
Six Peak owner group	50.0%
New investors	25.0%
Employee equity pool	25.0%
Total	**100.0%**

SECTION 3

Employee Equity Pool — 25%

The pool is allocated across the operating team, with Grady (Construction Lead) receiving the largest single allocation.

Recipient	% of Pool	% Total
Grady — Construction Lead	20.0%	5.0%
Tom Taggart — BD Director	12.0%	3.0%
Senior PMs (x4)	20.0%	5.0%
Mission Control team pool	25.0%	6.25%
Field leadership reserve	13.0%	3.25%
Future hires reserve	10.0%	2.5%

SECTION 4

Incentive Mechanisms

50% Salary Field Adoption Bonus

Field-facing staff (superintendents, APMs, field engineers, coordinators) receive a one-time bonus of 50% of annual salary tied to verified Mission Control adoption: at least 80% of daily field reports captured through the platform for 90 consecutive days. Paid from retained earnings, not the $5M raise.

Profit-Sharing Pool

A profit-sharing pool for operating employees is contemplated alongside the equity pool and the field adoption bonus. The pool's funding mechanism, threshold, and distribution schedule are **to be determined** and will be set once the updated pro forma is finalized.

SECTION 5

C-Corp Conversion Path

- LP-to-C-Corp via check-the-box election (Form 8832)
- QSBS qualification under Section 1202 (post-OBBBA): $15M per-shareholder cap, $75M gross-asset limit, tiered holding periods
- 10x basis advantage from existing LLC conversion
- NJ conforms to federal QSBS treatment (2026+); California does not (13.3% state rate remains)
- Conversion timed with the Mission Control capital event to maximize the QSBS window

> **For tax/legal review:** Section 1202 requires aggregate gross assets at or below $75M at the time of issuance. Given the contracted pipeline and the working capital it carries, this test may be tight — confirm eligibility and issuance timing with tax counsel. See the companion QSBS analysis.
