

SECTION 1

AI Team — Hiring Sequence

Mission Control requires a dedicated AI team alongside continued LV operational hiring. This plan covers the AI team; operational hires are in the Business Plan.

#	Role	Start	Cash + Equity
1	Construction-AI Translator	Month 1	\$220K + 2% pool
2	APM (operating partner for MC)	Month 1–2	\$145K + 0.5% pool
3	Field Tech Liaison (internal)	Month 2–3	+\$30K + 0.25% pool
4	Head of AI Operations	Month 3–4	\$280K + 4% pool
5	Process Engineer	Month 4–6	\$180K + 1% pool
6	Full-Stack Engineer (Lead)	Month 4–6	\$220K + 2% pool
7	AI/ML Engineer (Lead)	Month 6–8	\$260K + 2% pool
8	Data Engineer	Month 12–14	\$200K + 1% pool
9	CV Specialist	Month 14–18	\$240K + 1% pool

SECTION 2

Compensation Benchmarks

Role	Market band (LA)	LV target
Head of AI Operations	\$240K–\$350K	\$280K
AI/ML Engineer (Lead)	\$220K–\$320K	\$260K
Full-Stack Lead	\$190K–\$260K	\$220K
Process Engineer	\$160K–\$220K	\$180K
Data Engineer	\$170K–\$230K	\$200K
CV Specialist	\$200K–\$280K	\$240K

Senior roles carry equity-heavy packages from the employee pool to align incentives and conserve cash.

SECTION 3

Sourcing Strategy

Construction-AI Translator (Month 1)

The most critical hire. Target: 5–10 years in construction PM or superintending with clear technical interest. The Translator bridges the AI team and LV's field staff. Channels: ENR 40-under-40 alumni, Construction Dive network, targeted LinkedIn search.

Head of AI Operations (Month 3–4)

Target: former engineering lead at a construction-tech firm (Procore, Autodesk Construction, PlanGrid, Rhumbix). Channels: executive recruiter plus partner network.

Engineering ICs

Target: 4–8 years shipping production ML/web systems; construction experience not required. Channels: senior-engineer referrals, technical communities.

SECTION 4

Success Metrics

Role	Metric	Target
Translator	Modules delivered with >80% field adoption	6 by Month 18
Head of AI Ops	Sprint gate reviews passed	3 of 3
Process Engineer	Workflows automated	12 of 12 by Mo. 18
Full-Stack Lead	Platform uptime after Mo. 12	99.5%+
AI/ML Engineer	Cost-tracking accuracy vs. actuals	Within 2% by Mo. 18
Data Engineer	Field-event capture completeness	95%+

SECTION 5

Alternative Models

OPTION A

Agency / Consultancy

Fastest to start, highest ongoing cost, no data moat or platform equity. Rejected.

OPTION B

AI Tools Only

Lowest cost; works for individual PMs but doesn't scale or absorb roles. Retained as Phase 1 today.

OPTION C

Technical Co-Founder

Strong alignment and control; a strong fallback if the Head of AI Ops search stalls past Month 6.
